

IILM UNIVERSITY, GREATER NOIDA

INTERNSHIP REPORT PRESENTATION

Ethical Hacking

Virtual Internship

AICTE – EduSkills Virtual Internship Program | Supported by EduSkills Academy

Aaditya Nath Sharma

IILM University, Greater Noida

April – June 2026

Aaditya Nath Sharma

B.Tech – Computer Science & Engineering

ABOUT THE STUDENT

Candidate Profile

Roll Number

2410030080

Institute

IILM University, Greater Noida, U.P.

Programme

B.Tech CSE

Internship Domain

Ethical Hacking

Duration

8 Weeks | April – June 2026

ABOUT THE PROGRAM

EduSkills, AICTE & Ministry of Education

EduSkills Academy partners with the All India Council for Technical Education (AICTE) and the Ministry of Education to run the AICTE–EduSkills Virtual Internship Program under the National Internship Portal. For the Ethical Hacking track, EduSkills Academy delivers an industry-aligned curriculum covering network security, vulnerability assessment and penetration testing — a field the U.S. Bureau of Labor Statistics projects will keep growing sharply through the decade.

AICTE Patronage

Run under the AICTE National Internship Portal, Ministry of Education.

National Internship Portal

Registration and credentialing via the National Internship Portal.

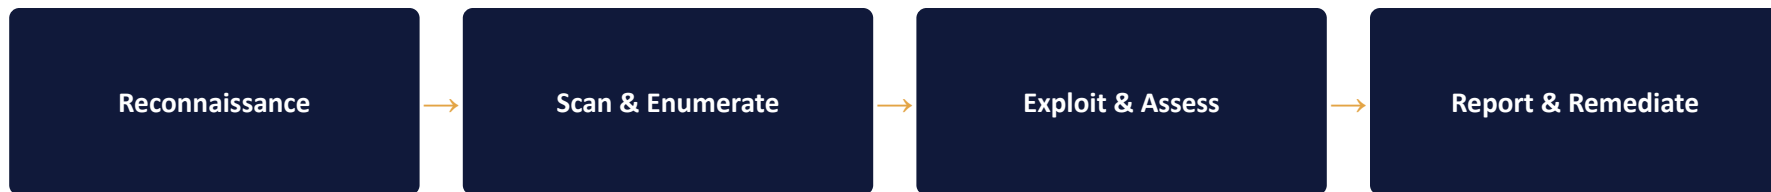

EduSkills Academy

Industry-aligned curriculum delivered by EduSkills Academy.

Bridging Theory and Applied Cybersecurity

Although engineering students study networking and security concepts in coursework, very few get structured, hands-on exposure to real attack-and-defence workflows using industry-standard tools. Concepts such as footprinting, vulnerability scanning, exploitation and reporting are often understood only theoretically, with little practice on live labs.

This internship addressed that gap — practising the full ethical-hacking workflow:

What the Internship Set Out to Achieve

Networking & OS Foundations

Build strong fundamentals in TCP/IP, Linux and Windows internals for security work.

Reconnaissance & Footprinting

Gather intelligence on target systems using passive and active recon techniques.

Scanning & Enumeration

Identify live hosts, open ports and services with tools such as Nmap.

Vulnerability Assessment

Discover and prioritise security weaknesses across systems and applications.

System & Web Exploitation

Practise controlled exploitation in lab environments using Metasploit and Burp Suite.

Reporting & Countermeasures

Document findings and recommend fixes in a professional penetration-test report.

The Toolkit Behind the Internship

Kali Linux

Primary penetration-testing OS

Nmap

Network scanning & enumeration

Wireshark

Packet capture & analysis

Metasploit

Exploitation framework

John / Hashcat

Password auditing

Burp Suite

Web application testing

OWASP ZAP

Web vulnerability scanning

VirtualBox / VMware

Isolated lab environments

The 8-Week Learning Journey

1 WEEK

Foundations of Ethical Hacking

Cyber laws, networking basics & security fundamentals

2 WEEK

Footprinting & Reconnaissance

Passive & active information gathering techniques

3 WEEK

Scanning Networks

Host discovery, port scanning & service enumeration

4 WEEK

Vulnerability Analysis

Identifying and prioritising system weaknesses

5 WEEK

System Hacking & Malware

Privilege escalation, malware and threat concepts

6 WEEK

Sniffing & Social Engineering

Traffic interception and human-factor attacks

7 WEEK

Web & Wireless Security

Web application and wireless network testing

8 WEEK

Penetration Testing & Reporting

Capstone assessment and final report writing

Skills & Capabilities Gained

- ✓ Ability to apply networking and OS fundamentals to real security scenarios
- ✓ Practical experience with reconnaissance, scanning and enumeration tools
- ✓ Hands-on exposure to vulnerability assessment and exploitation in lab environments
- ✓ Understanding of web application and wireless security testing techniques
- ✓ Skill to document findings and propose remediations in a penetration-test report
- ✓ Completed the 8-week Ethical Hacking Virtual Internship with an “A – Very Good” grade

CERTIFICATION

Successfully Completed

Grade

A – Very Good

Certificate ID

40598e35bb2e30493afd

Student ID

STU69ccb4bfe798e1775023295

Duration

8 Weeks | April – June 2026
